

I was recently notified about a new service that you have introduced called Low Power FM(LPFM) and how it would take precedence over current FM translator services. I disagree with this prioritization and request that you allow the FM translator service be priority of the LPFM. The reason I request this is because I listen to K-LOVE christian radio which has nation-wide coverage because of the FM translators. If you allowed LPFM to take precedence there would be a chance that I would not be able to listen to K-Love. K-Love fills a void in this area and around North America. It promotes christian values like love, forgiveness, marriage, civic responsibilities, obedience to God and to the government, among other things. If FPLM were to take precedence, the possibility would exist that other radio stations would keep this positive influence from our community. Many of these radio stations promote the negative values which hurt our society, like adultery, stealing, murder, foul language, smoking, civic irresponsibility, and rebellion against the government. Please don't allow this to happen.
